***Two Major UK Banks and a National Government Agency in Western Europe
Select A2iA DocumentReader™ to Automatically Classify Incoming
Customer Correspondence and Transaction Documents***

New York / Paris, FR, September 5, 2013 – A2iA ([@A2iA](#)), the worldwide leading developer of cursive handwriting and machine-printed text recognition, and intelligent document classification software, announced that [A2iA DocumentReader](#) has been selected by two large UK banks and a National Government Agency to automatically classify structured and unstructured incoming documents, including those that contain cursive handwriting.

Collectively, these two major UK banks process billions of documents each year and operate in a fast-paced and accuracy-dependent business environment. Embedded into a document management platform, *A2iA DocumentReader* processes large volumes of documents automatically and provides advanced classification and accurate data extraction without manual intervention – including complex service level agreements (SLAs) and handwritten customer correspondences.

A National Government Agency in the UK has also selected *A2iA DocumentReader* to process forms and unstructured documents. This major National Agency manages citizen benefits and handles more than one billion documents every year. With *A2iA DocumentReader*, they will be able to automatically capture images and data from handwritten and unstructured documents, speeding processing times and delivering more access to the information for search and reporting.

About A2iA DocumentReader™

[A2iA DocumentReader](#) is a powerful data recognition and document classification engine that drives successful workflow automation and digital file conversion processes for leading businesses worldwide. A2iA's signature technology includes its software's unique ability to locate, extract, understand, categorize and sort all types of data, including cursive handwriting, and convert these diverse data points into easy-to-use, searchable and highly valuable digital files.

About A2iA

A2iA, Artificial Intelligence and Image Analysis (www.a2ia.com), is the worldwide leading developer of handwritten and machine printed text recognition, information extraction and intelligent document classification toolkits. By enhancing solutions from systems integrators and independent software vendors, A2iA allows complex and cursive data from all forms, documents and checks including unstructured handwritten letters, to become part of a structured database, making it searchable and reportable, with the same level of flexibility of printed or digital data. Proven to reduce costs and nearly eliminate data-entry and manual document processing, A2iA has been improving business process automation and delivering a visible ROI for over 20 years.
